

For Mid South Tool Supply, it all began in a two room office with a desk, filing cabinet, single line phone and a commitment to satisfying customers needs. In November of 1988 Bobby Stewart, president of MSTs, saw an immediate need to service customers with a quality line of products, competitive pricing and un-matched technical expertise. Today things are not that different. MSTs currently has over 12,000 sq. ft of space, a few more filing cabinets as well as a multiple lines to handle phone calls, but the dedication to customer service and quality has only gotten better.
